Happiness Levels iOS App

PBL

Task	Description	Story Points
As a user, I want a splash screen that gives me a motivational quote	Connect app to an API that provides a motivational quote when the user loads the app	5
As a user, I want to use a slider to reflect my happiness level	Make a slider that updates a UI Label, in real time preferably, based on the input Inspiration from Bullseye app.	2
As a user, I want to have the option to type a description of why I am feeling happy	Have an optional textField that if the user inputted something it will show, and if not the app will not crash.	3
As a user, I want a preview of my happiness levels and if I added notes before they are permanently saved	Having a loading page that allows the user to see their input, and will need core data if it is to be saved Inspiration from Swift Guy's final app	5
As a user, I want a webpage that explains what the app is	I need to develop a simple one-page website in git-hub pages explaining what the app does	3
As a user, I want recommendations on what I should do to expedite my happiness levels	There needs to be buttons, similar to the color magic app from DevSlopes that allows the user to click on a cell/button and provides tips on if they're feeling happy they should: x,y,z || if they're angry, etc, do a,b,c	2
As a user, after I have previewed my log, I want to submit it	Create a button, or some type of segue from the preview page to the table view of memories	1

As a user, after I load my experience I want to exit out of the app to save screen time	Once the user logs happiness level, previews it, and approves it, segue to the table view where they can exit	2
As a user, I want to review my memories without having to create a new one	Create an option on the first page to show memories. Also update the flowchart	3
As a user, I want my data to be saved if I: turn my phone off/close the app, etc.	Connect app to firebase or core data	5
As a user, I want to see my memories	Create a table view with the following properties: Date! Happiness Level! Description?	4
As a developer I need to watch tutorials on core data	https://www.udemy.com/course/draft/1012458/learn/lecture/6100772#overview	5
As a developer I need to watch a tutorial on table views	N/A	3
